ABSTRACT

Promoting research integrity includes furthering the best research practices in proposing and conducting research, analyzing data, and reporting and publishing data and findings. In this session, we will consider research and governance practices that responsibly address sex and gender differences between men and women in research study design and reporting. We will review the distinction between sex and gender, and the importance (both scientifically and ethically) of taking sex and gender into account in research that involves, or applies to, humans. Selected guidelines and resources from regulatory bodies, research funding agencies, and the international Sex and Gender Equity in Research (SAGER) Guidelines will be highlighted.

Εργαστήριο Μελετών για το Κοινωνικό Φύλο, Τμήμα Κοινωνιολογίας-Πανεπιστήμιο Κρήτης

BIOGRAPHICAL INFORMATION

Carolyn Ells is an Associate Professor in the Department of Medicine and a member of the Biomedical Ethics Unit at McGill University. She also has appointments as Associate Member of the Division of Experimental Medicine and Department of Family Medicine, and Associate Researcher at the Lady Davis Institute for Medical Research. She holds a PhD in Philosophy with a concentration in biomedical ethics from the University of Tennessee, Knoxville.

Dr. Ells' current **research activities** are directed to 2 foci:

1) **Patient-centered care theory and its implementation in practice**

See for example: The Scleroderma Patient-centered Intervention Network (SPIN (<http://www.ladydavis.ca/en/SPIN>)); a partnership initiative on Transforming Mental Health Services (<http://216.187.92.170/en/research/melissa-m.-park>); (with Dr Matthew Hunt) a Patient Centered Care Ethics Analysis Model for Rehabilitation (PCEAM-R) https://www.mcgill.ca/biomedicalethicsunit/files/biomedicalethicsunit/ellshuntpceethicsanalysismodelrehabfinalv2jan_2014.pdf

2) **Research ethics review process and policy**

Her publications and policy analyses in the area of research ethics review have been used by policy makers in recommending revisions to normative texts, including the Declaration of Helsinki by the World Medical Association; the Tri-Council Policy Statement for Ethical Conduct for Research Involving Humans by the Social Sciences and Humanities Working Committee of the Panel on Research Ethics; and the American Association for Intellectual and Developmental Disabilities Consent Task Force.

Teaching

Dr Ells teaches BIOE-680 (Bioethical Theory), a required course in the Specialization in Bioethics Master's Program. She supervises graduate students in that program, teaches in the medical school, and provides continuing education lectures in bioethics to local health professionals. Dr Ells co-authored a 6-module on-line research ethics tutorial (http://ethique.msss.gouv.qc.ca/site/fr_formation_ethique.phtml) targeting research ethics board members and support staff within the Quebec health and social services network.

Professional service

- Chair, Interagency Advisory Panel on Research Ethics (PRE), Reporting to the presidents of Canada's 3 federal research funding agencies, PRE is responsible for the interpretation and evolution of their research ethics policy, the Tri-Council Policy Statement: Ethical Conduct of Research Involving Humans.
- International Network of Feminist Approaches to Bioethics, <http://fabnet.org/> member. Served on the Advisory Board 2001-2016 in various officer positions including 4 years as Co-Coordinator.
